

A closer look at pages 1 and 2 of your bill

- A** Your **account number**; **date** the bill was produced; and **amount due**.
- B** An **account summary** – showing your past billing and payment activity – your current charges and bill due date.
- C** If you are enrolled in **Budget Billing**, your Budget Billing summary displays your plan end month, current month's installment, actual charges since you started your budget year, budget amounts billed thus far and the difference between your actual charges and the budget amount billed. Interested in enrolling? Visit rge.com or call us to learn more.
Any **Miscellaneous Charges**, including payment and billing services charges, are not part of your monthly budget calculation, but are added to your total monthly bill.
- D** Your **account number**, **billing due date** and **amount due**.
- E** If you are enrolled in **Autopay**, AUTOPAY will display here. With Autopay, RG&E will automatically deduct your payment from your checking account 23 days after we mail your bill. Visit rge.com to learn more. If you are not enrolled in Autopay, write the amount you are paying here.
- F** Special **bill messages** with information specific to your RG&E service, energy usage and safety tips.
- G** How to **contact us** and information on where to send correspondence or your payment.
- H** You can notify us of a change to your **mailing and contact information** and enroll in Autopay by completing this form located on the back of your payment stub. You can also enroll in Autopay online at rge.com.

F Messages

We have not obtained an actual RG&E reading on the electric and natural gas meter(s) for some time. So we can bill you using an actual reading, please either allow us access to the meter on the next scheduled read date found on page 1 of this bill, or you can read the meter for us on or around that date. If you read the meter, submit your reading: online, by calling 1.800.295.7323, or e-mail us a picture of the meter. To learn more, visit rge.com, click on "Your Account," and then on "Reading Your Meter."

You can choose to purchase your electricity supply from an energy services company (ESCO) or RG&E. If you choose an ESCO, what you pay for your electricity supply depends on your agreement with the ESCO (your cost could be more or less than what you would have paid RG&E). With any supply choice, RG&E will continue to deliver electricity to you and you will continue to pay RG&E delivery, transition, and basic service charges. With ESCO supply, you would not have to pay RG&E's merchant function charge nor RG&E's bill issuance charge (if your ESCO charges appear on your RG&E bill) and you may have some tax savings.

Effective January 1, the System Benefits Charge (SBC) on electricity and natural gas bills and the Energy Efficiency Portfolio Standard (EEPS) charge on electricity bills have changed. The SBC is a state-mandated charge used to fund energy-efficiency programs to meet state energy-use reduction targets. EEPS is a state-mandated charge used to fund rebates and incentives to encourage people to buy and install high-efficiency energy appliances. For details, visit rge.com. Click on "Your Account" and then on "Reading Your Bill."

Due Upon Receipt	\$137.97
Amount Paid	AUTOPAY

Please do not write below this line.

A closer look at page 3 of your bill

I Symbols for electricity and natural gas service appear here so you can quickly find and review charges in each section. In addition, you'll see your rate and supply choice – this bill is for a residential customer enrolled in RG&E's Supply Service (purchasing electricity supply from RG&E at a variable market-based price) and RG&E Sales Service (purchasing natural gas supply from RG&E at a market-based price). To learn more about supply choice visit rge.com.

J Here you will find the time period you are being billed for and your **Point of Delivery ID (PoD ID)** – an essential number to give to energy suppliers other than RG&E (also known as energy services companies or ESCOs) if you choose to do business with them.

K Your **meter reading chart** shows whether your current and previous meter readings were actual, estimated, customer readings or if a reading was not available (Actual, Estimated, Customer or No reading).

L As required by state law, utilities must collect a special **state assessment** from all customers for the state's general fund. The SBC/RPS charge is the System Benefits and Renewable Portfolio Standard charge. The SBC/RPS is used to fund energy efficiency programs, assistance for low-income customers and energy research. It also includes the **Energy Efficiency Portfolio Standard**, which funds rebates that encourage people to buy and install high-efficiency energy appliances.

M You can purchase your **electricity** and/or **natural gas supply** from RG&E at a variable price or from an ESCO. RG&E **natural gas supply** prices take effect on the first of each month, so if your billing period spans two months, you will see two supply prices listed. Your energy supply charge (per kilowatt-hour or therm) is the amount you need to compare to offers you may receive. RG&E makes no profit on supply charges, and with any choice you make, RG&E will continue to deliver your energy safely and reliably.

N Customers who purchase their electricity and/or natural gas supply from RG&E pay a **merchant function charge**.

O **Electricity taxes** are listed separately.

Terms and Definitions

Delivery charge: what you pay RG&E to transport energy to your home or business.

Supply charge: what you pay for the energy purchased for you by RG&E or a supplier other than RG&E.

Payment & billing services charge: the cost to produce and send you (electronically or paper) a bill and process payments. Customers who use an energy supplier (also known as an energy services company or ESCO) other than RG&E will not be assessed this charge by RG&E if their ESCO's supply charges appear on their RG&E bill, however, their energy supplier may charge a similar fee.

Competitive meter charge, Competitive meter service charge, and Competitive meter data service: apply to customers billed under Service Class 3, 7, 8 or 9 whose metering services are provided by RG&E. These meter services charges, previously included in the customer charge, are now broken out in the electricity section of the bill. Customers with a demand of 50 kilowatts or more for two consecutive months who use a meter service provider and a meter data service provider other than RG&E are not assessed these charges.

Customer charge: includes a portion of the cost of the meter, meter reading (unless you are a customer billed under Service Class 3, 7, 8 or 9 with a demand of 50 kilowatts or more for two consecutive months whose metering services are not provided by RG&E) and part of the cost of delivery service. Appears on your bill whether or not you use any electricity and/or natural gas during the billing period.

Kilowatt-hours (kwh): measure of electricity use.

Residential consumer discount: monthly payment received from the New York Power Authority (NYPA) to be used for the benefit of residential customers. It is included in the Transition Charge.

ccf (hundreds of cubic feet): measure of volume of natural gas used. You are charged based on therms, the energy (heat) content of natural gas.

Merchant function charge: reflects the administrative costs of obtaining electricity and natural gas supply. Customers with a supplier other than RG&E are not charged by RG&E for this service.

New York State Assessment: As required by state law, effective July 1, 2009, utilities must collect a special assessment from all customers for the state's

POR administration charge: reflects administrative costs associated with customers whose energy service company (ESCO) participates in the Company's Purchase of Receivables program.

Renewable Portfolio Standard (RPS) charge: a state-mandated charge that funds renewable energy projects to achieve targets established by the Public Service Commission.

System Benefits Charge (SBC): a state-mandated charge for all electricity and natural gas customers. The electricity SBC is used to fund energy efficiency programs to meet state energy use reduction targets, provide assistance for low-income customers and conduct energy research. The natural gas SBC is used to fund initiatives focused on reducing natural gas use in the state as part of the Energy Efficiency Portfolio Standard. These charges were required by the Public Service Commission.

Revenue Decoupling Mechanism: a charge or credit on your bill that reflects the difference between forecast and actual delivery service revenues by service classification to encourage the promotion of energy efficiency and renewable technologies.

Weather adjustment: moderates natural gas bills during any extreme weather between October 1 and May 31. If temperatures during the billing period are colder than normal, customers typically receive a credit; if temperatures are warmer than normal, customers receive a charge.

Meter Mult (Meter Multiplier): when the actual amount of energy you use is more than can be registered on the meter, the meter displays a fraction of your actual use. A multiplier is then applied to determine your actual energy use. When a multiplier is used, it will be shown in the "Meter Mult" box under the "RG&E Detailed Account Activity" section of your bill.

Transition charge: reflects the costs of making the electricity industry more competitive; includes associated credits and/or charges.

Prorated bills: calculated by determining your average daily energy cost and multiplying it by the number of days in your billing period. Prorated bills are used only when your billing period is shorter or longer than usual.

Pay your bill by mail, at rge.com or at any of RG&E's authorized pay agents. If you pay in person, please bring your entire bill.

Payment is due when you receive your bill. Your bill is due on the date of receipt.

This bill is for illustrative purposes only.
