## PROJECT OVERVIEW

As part of our commitment to provide safe, reliable service to all our customers, Rochester Gas and Electric Corporation (RG&E), in conjunction with our parent company – AVANGRID, is updating the delivery system in our service areas. These upgrades comply with new electric transmission reliability requirements. While making investments to meet the community's growing energy demands, we are working closely with our neighbors to ensure that all improvements are performed with minimal disruption to the environment and the communities we serve.

## PROJECT PURPOSE AND NEED

This electrical infrastructure work is a critical component of the City of Rochester's local reconstruction project. The relocation and reconnection of the impacted circuits and the corresponding new duct bank installation is required to accommodate the project's scope of work and is vital for its overall success.

## BENEFITS TO THE REGION

Impacting approximately 400 valued customers, this electrical work will ensure the success of the City of Rochester's comprehensive reconstruction project. As a committed community partner, RG&E is proud to partner with the City in upgrading our infrastructure to meet the growing demands of our area. By continuing to provide safe, reliable service to the

region, we are providing the foundation for continued growth and economic development in Upstate New York.

## EAST MAIN STREET PROJECT SCOPE INCLUDES:

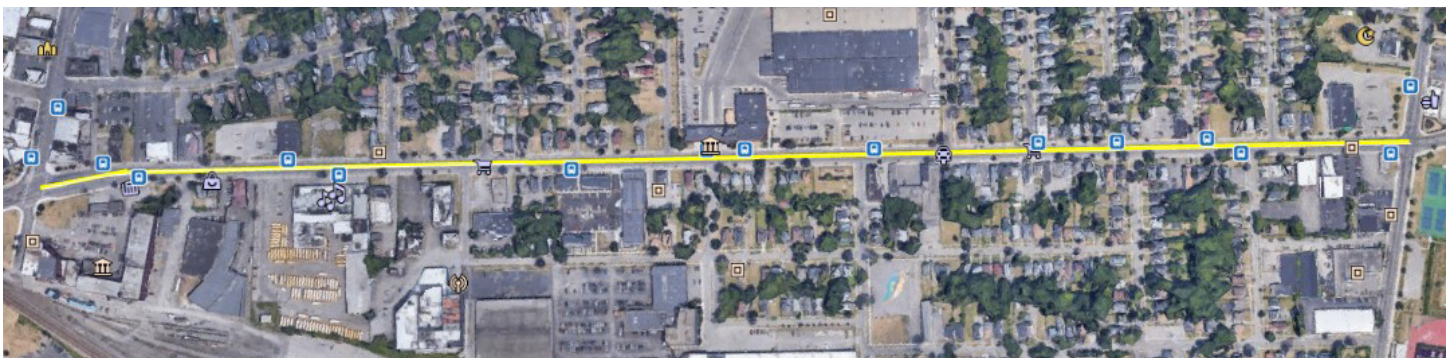

- Coordination with the City of Rochester as part of their full reconstruction of East Main Street - from Goodman Street to Culver Road
- The relocation and reconnection of approximately 1.25 miles of five, 4 kV circuits & 2, 11 kV circuits.
- The installation of 2.0 miles of new underground duct banks.

## PROJECT LOCATION

Municipalities:	City of Rochester
County Impacted:	Monroe
Permitting Required:	Local

## ESTIMATED TIMETABLE *subject to change*

Initial Field Work:	March 2021
Construction Start:	March 2021
In Service Date:	April 2022

In collaboration with The City of Rochester, the project's scope of work includes a full reconstruction of East Main Street - from Goodman Street to Culver Road (yellow line). The relocation of approximately one and a quarter mile of electrical circuits is critical to the success of the project, requiring reconnection to existing routes through two miles of new underground duct banks.
