

2021 Bulk Power Energy Storage Request for Proposals

APPENDIX E – Preferred Locations.....	2
Overview	2
Preferred NYSEG Locations.....	2
Location 1 – Hickling Substation Area - Elmira	2
Location 2 - Kiamesha Substation Area - Liberty.....	3
Location 3 – Green Street Substation Area - Auburn	4
Location 4 – Langdon Substation Area – Binghamton	5
Preferred RG&E Locations	6
Location 1 – Station 48 Area.....	6
Location 2 – Station 168.....	7

APPENDIX E – Preferred Locations

Overview

As part of the qualitative evaluation of Bidder proposals NYSEG and R&GE will evaluate the location of proposed projects. Both NYSEG and R&GE have identified preferred locations which are illustrated and described below. Please note the maps illustrate approximate boundaries and exact electrical connection to the load areas requires verification.

Preferred NYSEG Locations

NYSEG has identified four preferred locations within its service territory which are described in the following section.

Location 1 – Hickling Substation Area - Elmira

This 115 /34.5 kV two transformer substation serves primarily sub-transmission circuits providing electricity needs to a mix of residential and commercial customers. Hickling Substation is located off of Route 352, near the intersection with U.S. 17 (exit 48) in East Corning. The size of the project may be up to 19.9 MW, and the proposed project may investigate Points of Interconnection at Hickling or nearby 34.5 kV substations.

2021 Bulk Power Energy Storage Request for Proposals

Location 2 - Kiamesha Substation Area - Liberty

This 34.5 / 12.5 kV single transformer substation is in the center of the sub-transmission network bounded by Coopers Corners, Ferndale and West Woodbourne substations. Kiamesha Substation is located off Route #42, Northeast of the Village of Monticello. The size of the project may be up to 15 MW, and the proposed project may investigate points of interconnection at Kiamesha or nearby 34.5 kV substations.

2021 Bulk Power Energy Storage Request for Proposals

Location 3 – Green Street Substation Area - Auburn

This 34.5 / 4.16 kV two transformer substation is in the center of the sub-transmission network between Wright Ave and State St substations. Green Street Substation is located in the city of Auburn to the southwest of the intersection of State Street and Arterial W. The size of the project may be up to 10 MW.

2021 Bulk Power Energy Storage Request for Proposals

Location 4 – Langdon Substation Area – Binghamton

This 115 /34.5 kV two transformer substation serves primarily sub-transmission circuits providing electricity needs to a mix of residential and commercial customers. Green Street Substation is located on Route 11 near Five Mile Point, in the Town of Kirkwood, southeast of the city of Binghamton. The size of the project may be up to 20 MW, and the proposed project may investigate points of interconnection at Langdon or nearby 34.5 kV substations.

2021 Bulk Power Energy Storage Request for Proposals

Preferred RG&E Locations

RG&E has identified two preferred locations within its service territory which are described in the following section.

Location 1 – Station 48 Area

This 115 /34.5 kV and 115 / 11.5 kV four transformer substation serves sub-transmission circuits providing electricity needs to a mix of residential and commercial customers. Station 48 is located at 853 Lexington Avenue, Rochester NY. The size of the project may be up to 20 MW, and the proposed project may investigate points of interconnection at Station 48 or nearby 34.5 kV substations.

2021 Bulk Power Energy Storage Request for Proposals

Location 2 – Station 168

This 115 /34.5 kV and 115 / 12 kV three transformer substation serves sub-transmission and distribution circuits, providing electricity needs to a mix of residential and commercial customers. Station 168 is located at 4400 State St, Manchester NY. The size of the project may be up to 20 MW.
