

Energy Services Companies (ESCOs)

Environmental

Update

All energy services companies (ESCOs, also known as suppliers) are required to provide their customers with periodic environmental disclosure information on fuel sources and air emissions for the electricity supply they purchase.

- If you receive your electricity supply from a supplier other than RG&E and your ESCO's charges are included on your RG&E bill, your ESCO's environmental disclosure information is provided here.
- If you receive your electricity supply from RG&E, the latest environmental disclosure information is published in the May and November issues of *EnergyLines*, RG&E's bill insert. RG&E's current information is also available at [rge.com](https://www.rge.com).
- If you buy electricity from a supplier other than RG&E and your ESCO charges are not included on your RG&E bill, you should receive environmental disclosure information directly from your ESCO.
- If you buy green power from your ESCO as part of a green power program, your environmental disclosure information may be different. Please contact your ESCO.
- RG&E is required by the New York State Public Service Commission (PSC) to publish this information twice a year with the most recent data provided by the PSC and the New York State Energy Research and Development Authority (NYSERDA). If your supplier did not serve any RG&E customers from January 2021 through December 2021, your supplier's data is not included in this insert.
- For more information about environmental disclosure, contact the PSC at [888.ASK.PSC1](tel:888-ASK-PSC1) (888.275.7721) or NYSERDA at [866.NYSERDA](tel:866-NYSERDA) (866.697.3732).

If you have questions regarding your ESCO's environmental disclosure information, please contact your ESCO.
