Should the residential applicant refuse to provide positive identification, service may be denied to such applicants, pursuant to 16 NYCRR 11.3 or a deposit may be required pursuant to Rule 2.B.(1).

A written application containing the required information shall be deemed completed when received by the Company.

E. SUBMETERING OF GAS SERVICE

(1) Residential Service:

Gas service shall not be supplied under any of the Company's service classifications of this schedule for resale, remetering (or submetering) or other redistribution to tenants or occupants, except that any customer may furnish gas for the use of their tenants or occupants, provided that the customer shall not resell, make a specific charge for, or remeter, (or submeter) or measure any of the gas so redistributed or furnished

(2) Commercial and Industrial Service:

Gas customers may petition on a case-specific basis for permission to submeter. Landlords may be permitted to submeter commercial and industrial tenants upon the filing with the Public Service Commission of a petition and application that resolves the concerns of safety, rates, and consumer protection by establishing conditions governing the submetering. The petition and application must be served on the Company and all affected tenants. Unless otherwise acted upon within 75 days of filing, the application shall be deemed approved at the end of that period.

The four major concerns which shall be addressed in any application are: (1) safety; (2) price impact for the ultimate customer; (3) non-price customer protection issues; and (4) service provider and Company matters. A successful application shall sufficiently address each of the aforementioned areas as elaborated below:

(a) Safety:

Customers petitioning for permission to submeter must ensure that its installation shall comply with all applicable codes and regulations. The application must contain the name, address, and telephone number of the person or entity responsible for repair, safety and maintenance, and affirm that both tenants and the Company shall be furnished with this information.

Where such submetering of gas shall result in pipes pressurized at 2.0 psi or above, the submeterer, besides providing the Company with such information on the operator of the submetering system, must identify all personnel installing or maintaining the system, and must provide the Company with evidence certifying that those personnel are trained and qualified to work on high-pressure gas piping. Submeter shall also show that those facilities served off such high pressure lines, that do not require high pressure, shall have the appropriate regulation and follow the required venting guidelines. The submeterer shall update the evidence whenever new personnel are assigned to perform installation, repair, or maintenance tasks.

The Company shall respond in the event of any emergency or gas leak.

(b) Prices:

The submeterer shall commit to charge gas prices which do not exceed those tariffed by the Company for similar service. Submetering which results in higher prices than those tariffed for end-users shall result in denial of the application.

(3) Other Customer Protection Issues:

(a) Dispute Resolution:

All applications must provide for an effective and objective dispute resolution process.

(b) Meter Accuracy:

Meter accuracy must be assured. Submeterers must devise and adhere to conditions providing for periodic master meter readings and reconciliation of those readings to the submetered customers' meters.

Meter calibration must be assured. Submeterer must promise to calibrate meters any time they are installed or repaired or on an annual basis if requested by the submetered customers.

Submeterer shall guarantee that only meter models and ancillary equipment approved by the Company and the PSC shall be installed.

(c) End-User Notification Requirements:

Prior to termination of service to a submetering customer, the Company shall seek to inform submetered tenants of the termination through posting notices, mailing, or any other method the Company believes most likely to reach the greatest number of submetered tenants.

Submeterer shall provide to the Company, on a timely basis, a listing of all submetered customers' names, addresses, phone numbers, and contact names to ensure that the Company can contact submetered customers. Submeterer shall update such list every time there is a change to any portion of the required information.

(4) Service Provider and Company Matters:

All applications for submetering service shall attempt to identify any specific or unusual issues related to service provision or Company impact. Inclusion or exclusion of any such matters shall not necessarily be considered the definitive authority on any issue. The Company maintains the right to intervene in any application affected by such issues.

(5) Application Procedures:

Customer desiring approval for the submetering of gas service to industrial or commercial tenants must submit a petition and application to the PSC that addresses all of the concerns discussed under Section 9 of this Schedule, and provides that the conditions proffered shall be reiterated in leases with the submetered tenants. The petition and application must be served on the Gas Pricing Department of the Company and all affected tenants.

- (9) Notwithstanding all of the foregoing provisions of this Rule 2.F, the Company may, at any time, refuse to accept additional applications for new or additional gas service if, in its sole discretion, the Company believes that its supply and load circumstances are such that it cannot provide additional service without jeopardizing its already attached customers, provided, however, that the Company shall promptly advise the Public Service Commission of any such refusal, and the Public Service Commission shall have the right to require that the Company resume acceptance of some or all applications for service.

No applicant may rely on obtaining new or additional gas service unless and until the Customer's application is accepted by the Company. Unless otherwise specified in the Company's acceptance of an application, such acceptance shall only be binding upon the Company if the applicant is actually ready to take the new or additional gas service within 180 days after the date of such acceptance.

(10) Moratorium Need Criteria:

- a. Prior to the Company's notification to the Public Service Commission in accordance with Section above, the Company will evaluate projected demand to determine if it can be met (including, but not limited to maintaining acceptable pressure both on the Company's system and at the end-use customer's site) in accordance with the Public Service Commission's May 12, 2022, Order Adopting Gas System Planning Process in Case 20-G-0131. If it is determined that the Company is unable to meet projected demand, the Company may pursue alternative solutions, however, reliability for existing customers shall not be compromised.
- b. At least two years in advance of the potential implementation date of a moratorium, the Company will make a filing with the Commission identifying potential moratorium locations ("Notice of Potential Moratorium"). The Notice of Potential Moratorium must include metrics and their associated values within the communities where the moratorium may be in effect. The metrics will demonstrate the need for the moratorium and allow interested entities to work with the LDC on NPAs.
- c. The criteria that the Company will evaluate prior to declaring a moratorium are listed below:
 1. Forecasted design day supply/demand imbalances through:
 - i. MMBtu per day available for delivery;
 - ii. Expected equivalent number of typical new residential or commercial and industrial customers; and
 - iii. The estimated years of expected growth that the system can absorb.
 2. Pressures at distribution system lateral endpoint for forecasted design day and historical consecutive day cold snap peak hours, looking at:
 - i. Minimum endpoint pressure for each geographic zone;
 - ii. Minimum endpoint pressure as a percentage of Maximum Allowable Operating Pressure ("MAOP") for each geographic zone; and
 - iii. The average endpoint pressure as a percent of the MAOP for each geographic zone.

- e. The Company will declare a moratorium as a last resort when it reaches the conclusion that it may not be possible to address any potential supply/demand imbalance in time to avoid the imbalance. The Company will file a Notice of Moratorium at least 120 days before the institution of a moratorium.

G. KIND OF SERVICE

While the Company shall at all times endeavor to furnish service under any of its standard classes of distribution best suited to the customer's requirements, nothing in this Schedule shall be interpreted as requiring the Company to render service other than that established as standard for the district in which customer's premises are located or to tap its distribution or transmission system except as found feasible by its engineers.
