

## GENERAL INFORMATION

### 16. Non-Wire Alternatives (“NWA”) (Cont’d)

#### C. Cost Allocation

The costs will be allocated to each service class based on the following allocators:

- (1) coincident peak demand for the transmission portion (if any) of the deferred traditional project; and
- (2) non-coincident peak demand allocator for the sub-transmission and distribution portions of the deferred traditional project.

Once allocated to each applicable service class, the costs will be recovered through the Transition Charge. If an NWA project will benefit only certain service classes, the cost allocation will be limited to the benefitted classes.

#### D. The NWA Surcharge is applicable to customers taking service under Service Classification Nos.: 1, 2, and 3 regardless of supplier.

#### E. Filings and Statements

A NWA Statement setting forth the NWA Surcharge rates shall be filed with the Commission on not less than 30 days’ notice. Such statement may be found at the end of this Schedule.
